

HOW TO MAKE A DUCK HAT

- 1.** Pick up the following materials from volunteers: A white foam section, orange foam section, yellow foam section, and yellow foam strip.
- 2.** Use the templates to trace two eyes on white foam, one beak on orange foam, a head on yellow the yellow foam. Carefully cut out each!
- 3.** Glue the white foam eyes onto the yellow head then glue the wiggle eyes on top of the white foam.
- 4.** Take your orange beak and mark the top with two black lines to make nostrils for your duck!
- 5.** Curve the beak so it makes a semi-circle with the tabs curved side down. Staple the taps to the head on the lower part of the eyes. Secure the beak with a piece of tape in the center, if needed.
- 6.** Use the yellow strap to measure how big your hat should be, then staple to the tabs on the head.
- 7.** Finish your duck hat by adding feathers! Can you waddle and quack like a duck now?
