

# INSTRUCTIONS FOR MAKING A FLY CATCHER

1. Collect your materials: 1 cardboard roll, 2 wiggly eyes, 1 red ribbon, and 1 plastic fly
2. On one end of the roll, push in the cardboard to create “legs”.
3. Use the stamps to create a bumpy skin texture. Try using different colors!
4. Glue on two wiggly eyes.
5. Tie a tight double knot around your fly with the ribbon then tape the other end inside the roll.
6. Now you have your fly-catching toad! Practice catching the fly inside the toad’s “mouth” by swinging the ribbon into the hole.
