

HOW TO MAKE A MINI BANJO

- 1.** Pick up one white lid and one wooden stick from the materials table.
- 2.** Choose 5 rubber bands and carefully stretch them across the lid so that they are all almost touching. Now your banjo has 5 strings!
- 3.** Place a small piece of tape across the bands on the top and bottom of the lid's edge on the back of the banjo (top of the lid).
- 4.** On your wooden stick, draw 5 long lines to represent the 5 strings of your banjo. At the end of each line, draw a dot to represent the tuning pegs.
- 5.** To create the neck of your banjo, tape your wooden stick in the center of the top of the lid (solid side). Make sure your strings are facing toward the open side of the lid!
- 6.** Decorate your banjo and then pluck away!
